

Fraser High School Robotics

Horsepowered
7597

Presented by: Fraser Robotics
Marketing Team

What?

Participating in our robotics team equips students with essential skills in coding, engineering, and business. These experiences not only enhance their technical abilities but also strengthen teamwork and problem-solving skills, preparing them for future careers in technology and innovation. By engaging in hands-on projects, students learn how these fields connect and create different job opportunities in today's changing job market. Additionally, your company/business will be showcased on our shirts, website, posters around our tent, and social media platforms.

Why?

Sponsoring the Fraser High School robotics team is a smart investment for sponsors. It helps students build important skills in science and technology and creates a pathway for them to find future jobs. Sponsors show they care about their community and support education by getting involved. They also gain visibility and can connect with local leaders and educators. This partnership benefits students and aligns with goals for social responsibility, helping to create a skilled workforce for the future.

For our team to compete, we have to raise \$6,000.00; every dollar counts.

How

Sponsors can help out with both their support financially and/or by lending a helping hand with our projects done here at Fraser High School or at competitions.

Some ways to help us:

Food

Parts

Time

Financially

Sponsorship Packages

Donations of varying amounts will receive corresponding levels of recognition from our robotics team.

Overall, every sponsor will be on our robot, t-shirts and will also be on a poster, put up at our competitions, in the pit!

Will be sponsored on our robot and t-shirt

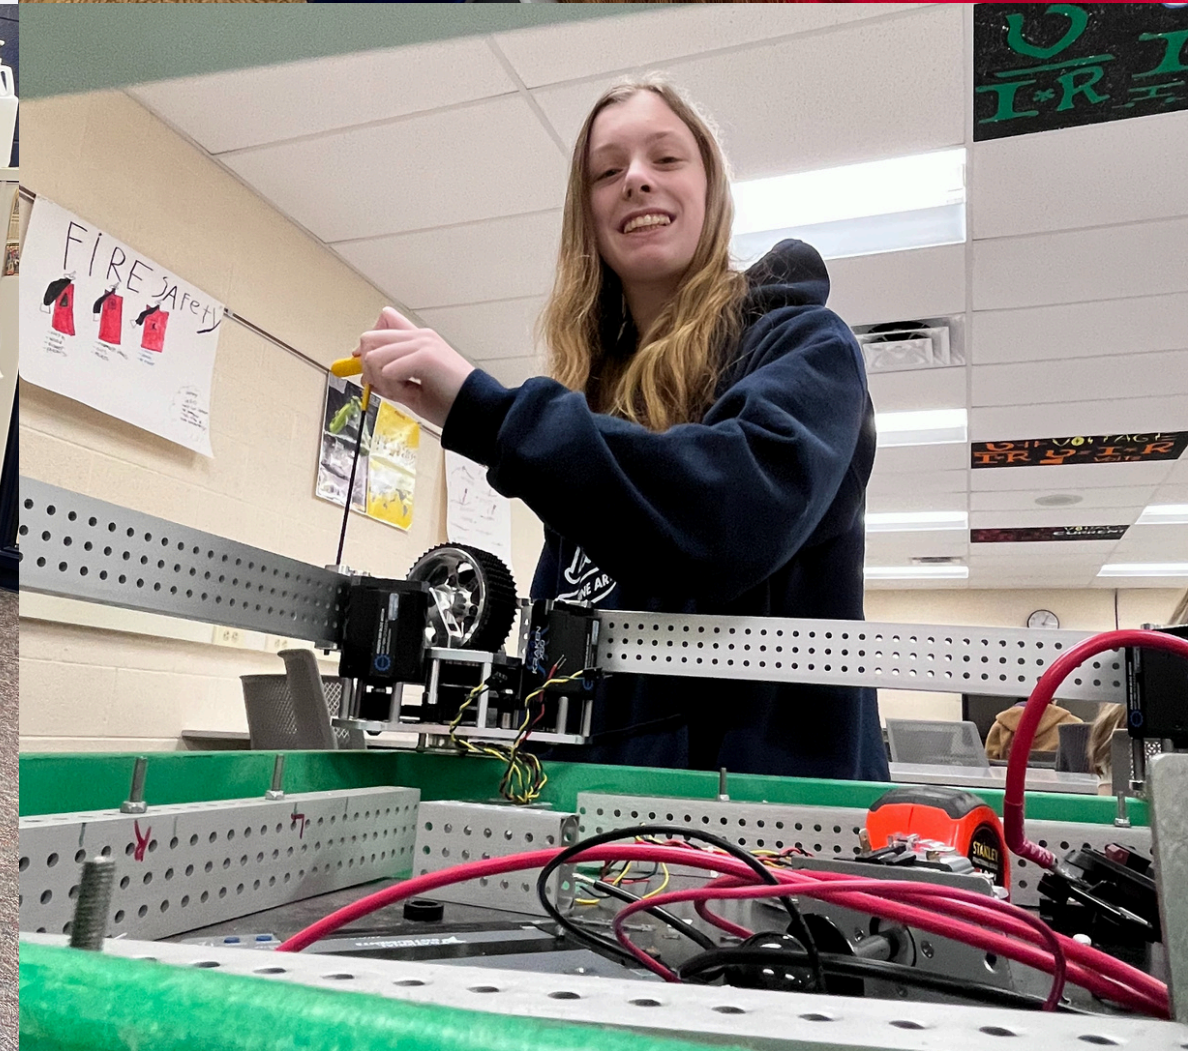

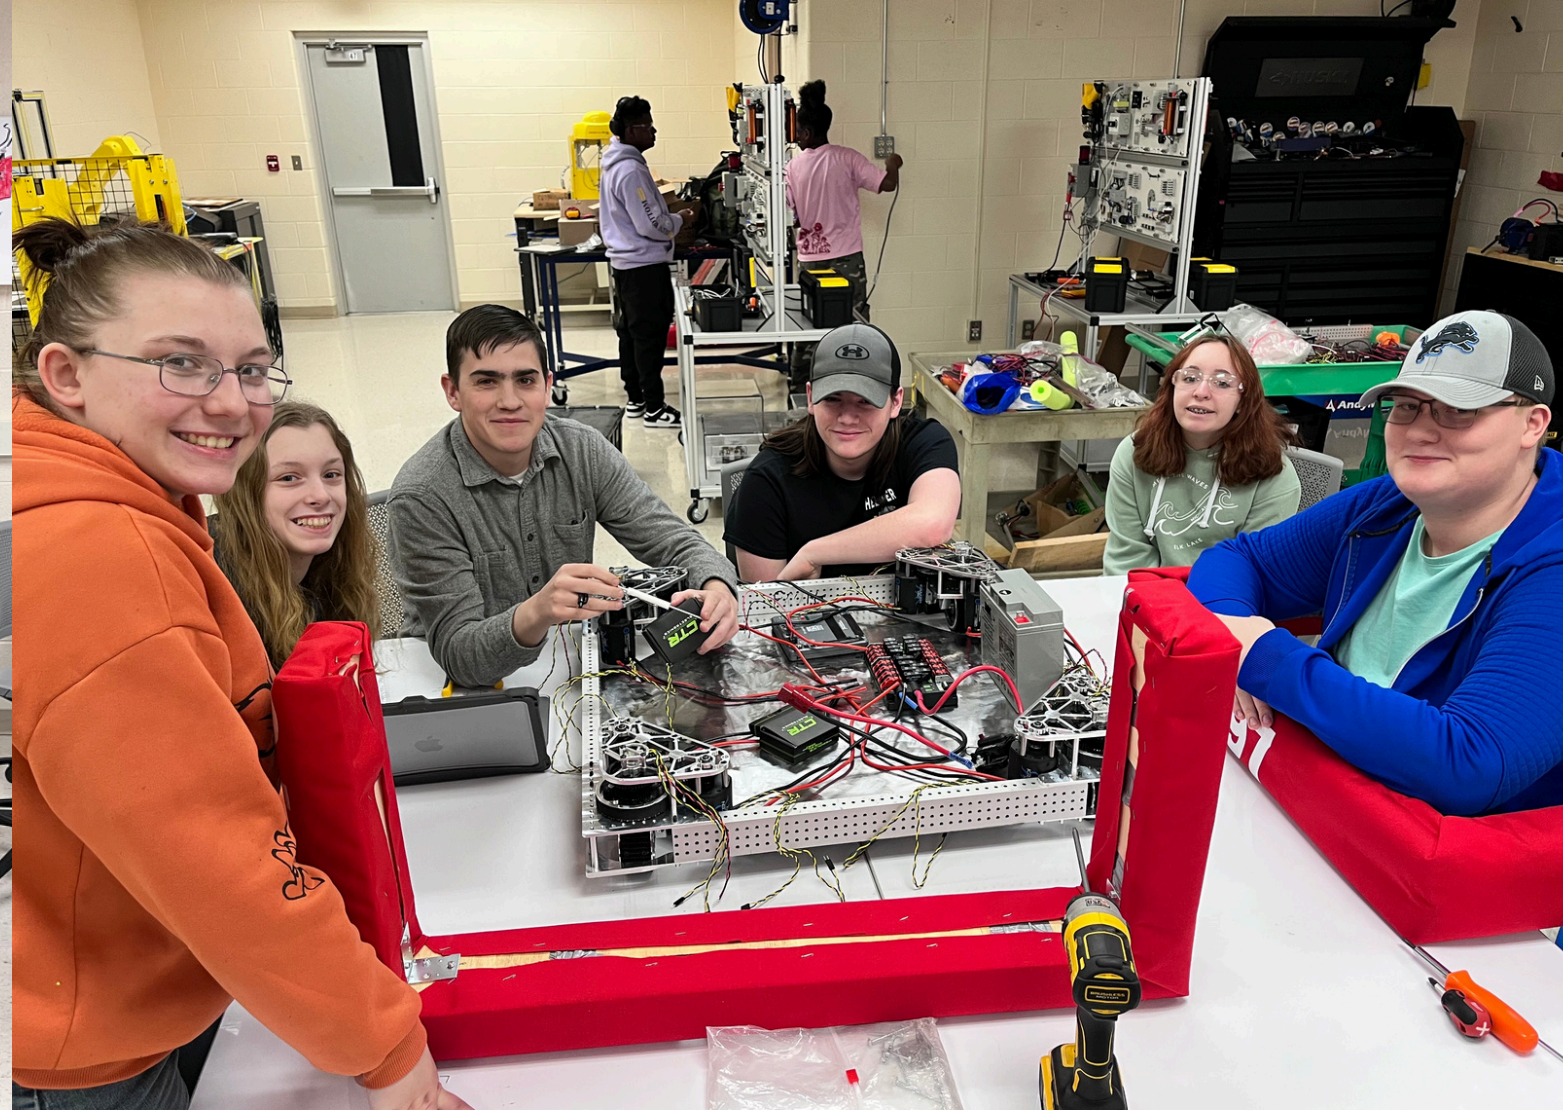

\$1-\$500

Will be sponsored on our robot, t-shirt, website, and social media

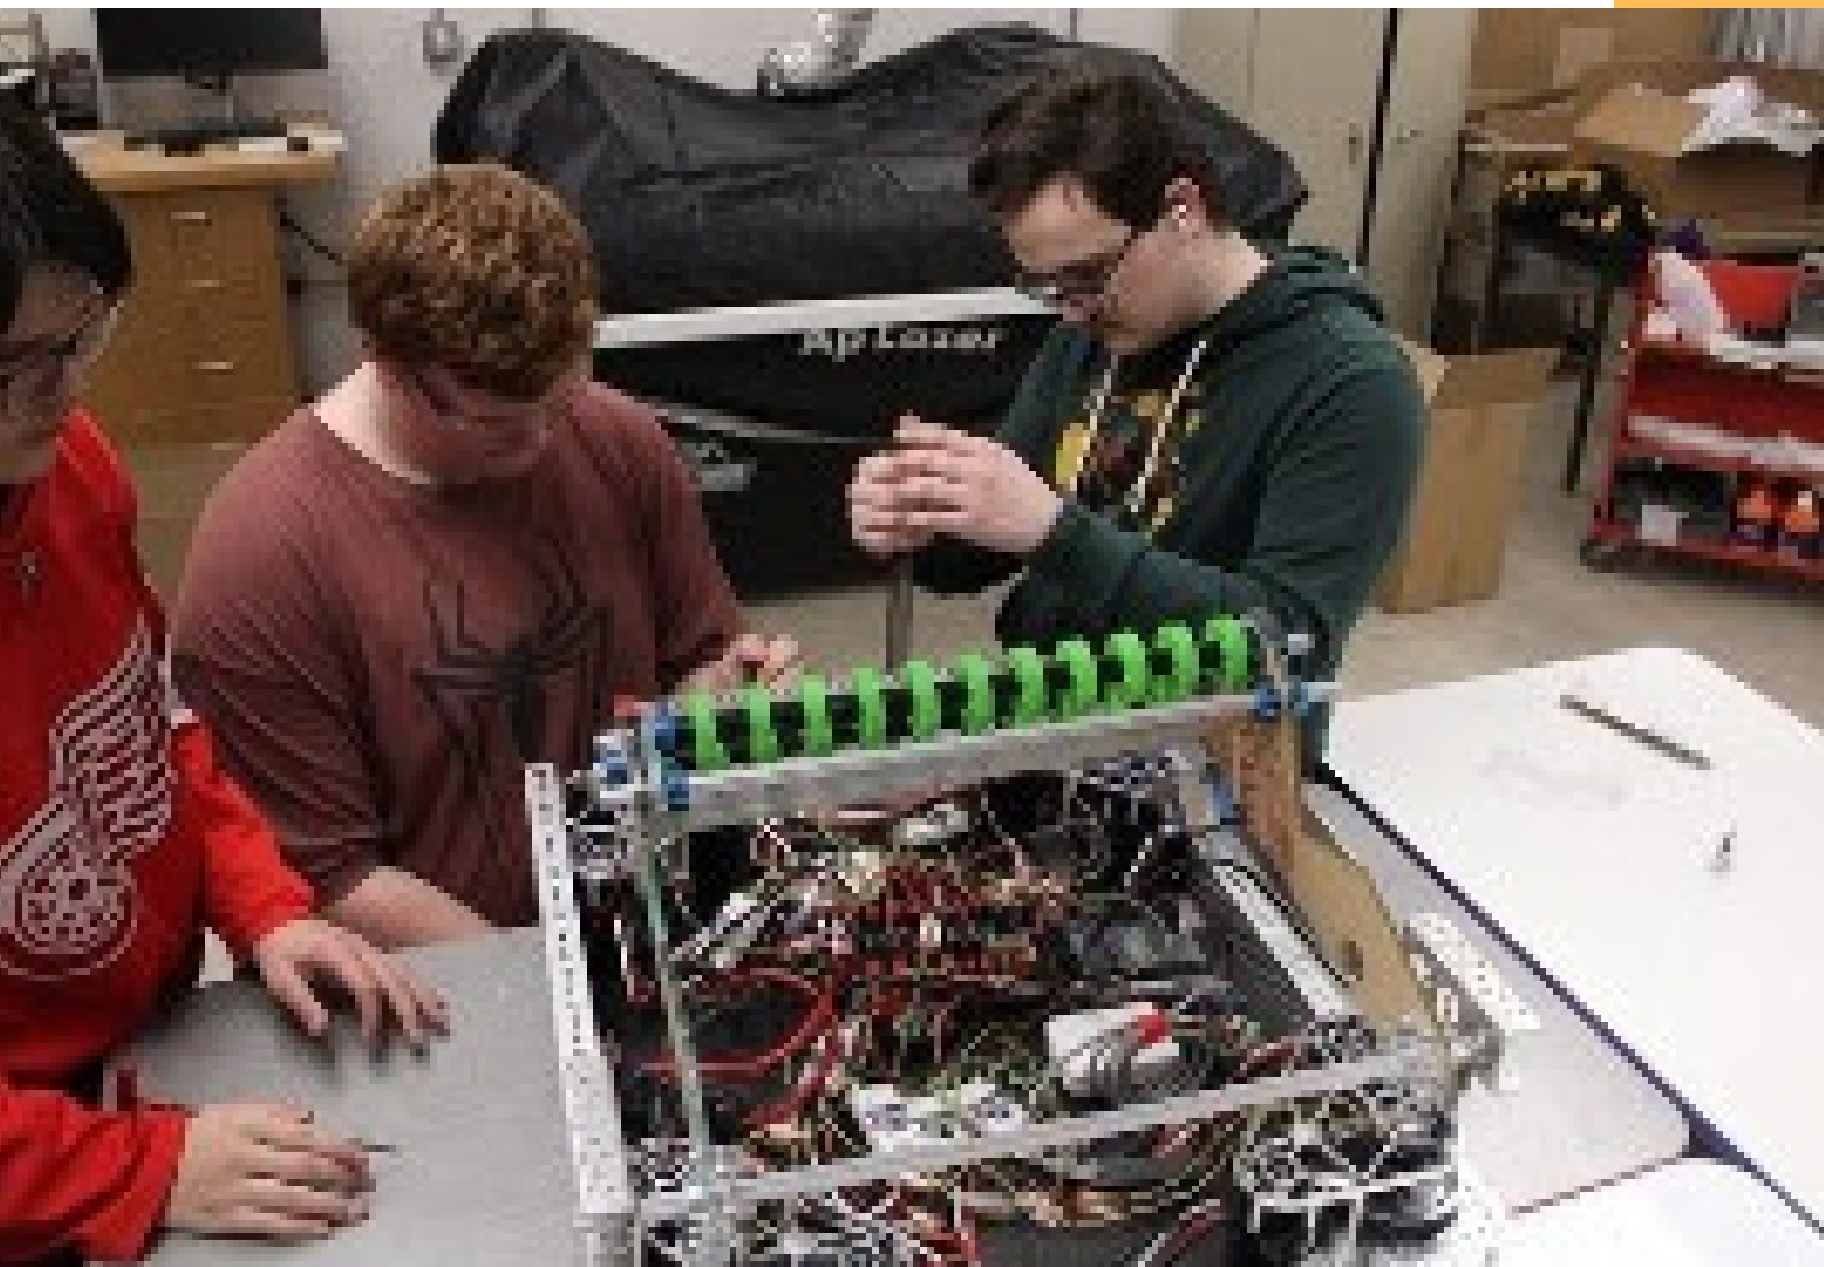

\$1,001 +

\$501-\$1,000

Will be sponsored on our robot, t-shirt, and website

Thank You!
