

E.18 Refuse Best Management Practices (BMP)

Description

The District will review alternatives for refuse management, ensuring storm water compliance. The following BMPs apply at all facilities where any waste, scrap, trash, or debris is generated.

Pollution Prevention

- Keep all trash container lids closed at all times unless adding or removing material.
- All waste receptacles (dumpsters or cans) should be leak-tight with tight-fitting lids or covers.
- Do not place outdoor waste receptacles near storm drains or ditches unless at a lower elevation.

Protocols

- Return leaking dumpsters to the owner for replacement.
- Repair or replace missing or poorly fitted lids or covers on waste receptacles promptly.
- Never place liquids or liquid-containing wastes in a dumpster or trash receptacle.
- Sweep up around outdoor waste containers regularly.
- Do not wash out waste containers or dumpsters outdoors
